

国際学会

2024 (令和6年)

- 1 K. Nishino, T. Yuge, M. Hongo, N. Mori, K. Shimamoto, Y. Kobayashi, H. Ban .
EFFECT OF PROPHYLACTIC CLOSURE OF MUCOSAL DEFECTS AFTER COLORECTAL
ENDOSCOPIC SUBMUCOSAL DISSECTION ON POSTOPERATIVE ADVERSE EVENTS: A
PROPENSITY SCORE MATCHING ANALYSIS, ENDO 2024, July 7, 2024 (Korea)
- 2 Nakao S, Imai T, Ohno M, Nishida A, Inatomi O. Real-World Experience with JAK
Inhibitors in the Treatment of Ulcerative Colitis: A Single-Center Retrospective
Study. 32nd United European Gastroenterology Week (UEG Week 2024) October
12-15, 2024 (Wien)
- 3 Imai T, Nakao S, Inatomi O. Fetal Thiopurine Sensitivity in a Mouse Model Based on
NUDT15 Gene Polymorphism. 32nd United European Gastroenterology Week (UEG
Week 2024) October 12-15, 2024 (Wien)
- 4 Nakao S, Imai T, Ohno M, Nishida A, Inatomi O. Postoperative Course of Crohn's
Disease and the Efficacy of Endoscopic Dilatation: a single-center Retrospective
Study. 32nd United European Gastroenterology Week (UEG Week 2024) October
12-15, 2024 (Wien)
- 5 Shintani S, Inatomi O. Diagnostic accuracy if endoscopic ultrasonographic shear
wave elastography for assessing early chronic pancreatitis diagnosed by the Japanese
Diagnostic Criteria 2019. 32nd United European Gastroenterology Week (UEG Week
2024) October 12-15, 2024 (Wien)
- 6 Mori T, Shintani S, Inatomi O. Presence of type 2 diabetes mellitus is associated
with increased shear wave speed in pancreatic parenchyma of Intraductal papillary
mucinous neoplasm . 32nd United European Gastroenterology Week (UEG Week
2024) October 12-15, 2024 (Wien)
- 7 Yasuda T, Shintani S, Inatomi O. Endoscopic ultrasound-Shear wave elastography
for pancreatic cancer is characterized by lower reliability of shear wave velocity due
to tissue heterogeneity. 32nd United European Gastroenterology Week (UEG Week
2024) October 12-15, 2024 (Wien)
